

Environmental Objectives

CBI-electric: low voltage has identified the type of environmental impacts that our plants operational, manufacturing and service activities have on the environment. These impacts have been assessed and CBI-electric: low voltage, have identified which aspects potentially have a major impact on the environment. To reduce the risk of occurrence of these impacts on the environment CBI-electric: low voltage have set the following objectives:

- Measure and reduce waste by:
 - Promotion of general waste recycling.
 - Implementation of plastic recycling.
 - Recycling of all ferrous and non-ferrous metals.

- Promotion of energy and resource conservation by:
 - Reduction of paper usage.
 - Reduction of water usage.
 - Reduction of power usage.

- Proper control of chemical substances by:
 - Compliance with the legal requirements and or customer specific requirements.
 - Recycling or safe disposal of hazardous chemicals.
 - Reduction and / or elimination of the use of hazardous substances.
 - Training of personnel involved in the handling of chemicals.

- Development of environmentally friendly products by:
 - Reducing the products energy consumption.
 - Identifying recyclable components in the product.
 - Elimination of restricted substances and substances of high concern as detailed in the REACH and RoHS directives.
 - Establishment of product disposal procedures.

CBI-electric: low voltage, will provide adequate resources to ensure that the policy, is communicated, understood, implemented and maintained throughout all levels of operation within the company.
