

## Environmental Policy

CBI-electric: low voltage recognises the impact of its operations on the environment and is committed towards continual improvement and prevention of pollution. The organisation continually strives to improve its activities, products and services where applicable, with respect to minimising our impact on the environment.

CBI-electric: low voltage is committed to comply with the relevant legal, regulatory requirements and industry standards to which the company subscribes. Environmental best practice methodologies are to be adopted, where practical.

The Environmental Policy of CBI-electric: low voltage shall be communicated to all employees including interested and affected parties.

We strive to achieve these commitments through:

- Setting of environmental objectives and targets, including the measurement and monitoring thereof.
- Provide appropriate environmental awareness and training to all employees and encourage continual improvement.
- Promote environmental best practices and where possible select suppliers committed to sound environmental practices.
- Minimising waste and conserving our natural resources.
- Adhering to the RoHS directives as documented by the European Union Directives 2011/65/EC; 2015/863/EU; 2018/379/EU & 2018/741/EU.
- Adhering to the REACH candidate list of “Substances of Very High Concern” as detailed in Annex XVII.
